

## SLING, Conference/Dining Table

The intention for Sling was to create a feeling of weightlessness. Traditional table design requires robust aprons under the table to restrict the top from bowing under its own weight. Using a honeycomb aluminium core (more commonly found within the aerospace industry) this veneered tabletop does not require any apron. Combined with elegantly twisting legs, the overall effect is one of clean lines, enhanced by pleasing details such as the contrasting splines in each corner. Without the distraction of a cumbersome apron, the silhouette of Sling perfectly reflects the qualities sought in a modern pared-back architectural style.

*Sling in ebonised oak with copper splines*

*Sling in natural oak*

You can choose from a vast selection of the highest quality of FSC certified veneers and a variety of finishes to best compliment your space as well as contrasting timber/metal for the corner splines.

*Height: 75cm (29.5in)*

*Width: 90cm-140cm (35.4in-55.1in)*

*Length (seats 8): 180cm (70.9in)*

*Length (seats 8-10): 220cm (86.6in)*

*Length (seats 10): 250cm (98.4in)*

*Length (seats 10-12): 300cm (118.1in)*

*Lead time: 8 weeks*

*N.B. Our other leg designs are available to use with this tabletop construction.*
